Standard Terms and Conditions

Axon Enterprise Inc. Sales Terms and Conditions

Axon Master Services and Purchasing Agreement:

This Quote is limited to and conditional upon your acceptance of the provisions set forth herein and Axon Evidence Justice Services Agreement executed on 23 December 2023.

Acceptance of Terms:

Any purchase order issued in response to this Quote is subject solely to the above referenced terms and conditions. By signing below, you represent that you are lawfully able to enter into contracts. If you are signing on behalf of an entity (including but not limited to the company, municipality, or government agency for whom you work), you represent to Axon that you have legal authority to bind that entity. If you do not have this authority, please do not sign this Quote.

Exceptions to Standard Terms and Conditions

Agency has existing contract(s) originated via Quote(s):

Q-499963,

Agency is terminating those contracts effective 1/1/2026. Any changes in this date will result in modification of the program value which may result in additional fees or credits due to or from Axon.

The parties agree that Axon is applying a Transfer Balance of -\$76,874.06

This Agreement begins on the Effective Date of 1/1/2026 and continues until June 30, 2026. Upon expiration of the Initial Term, the term of the Agreement shall renew automatically for ten (10) additional one (1) year terms, for a total overall term of one-hundred twenty-six months (126), unless Agency notifies Axon of its intent to terminate ninety (90) days prior to the current expiration date. Agency's election not to renew for the full ten (10) terms shall be treated as a termination subject to relevant terms of the Agreement

TABLE OF CONTENTS

EXECUTIVE SUMMARY

Axon continues to push the boundaries of innovation, delivering solutions that transform how digital evidence is managed and utilized. As part of this commitment, we are excited to introduce Axon Justice Plus—a Premier upgrade designed to help legal professionals more efficiently handle the ever-growing volume of digital evidence.

In response to the increasing demands on government attorneys, Axon Justice Plus incorporates new features that streamline workflows, reduce case review times, and drive significant cost savings. These enhancements directly address the challenges of evidence management, ensuring that prosecutors, defense attorneys, and courts can work more effectively with large and complex datasets.

The following new features are included in Axon Justice PLUS

BriefOne AI Evidence and Case Summaries

Our AI-powered summarization tool scans and analyzes digital evidence to generate concise, case-specific summaries. This feature significantly reduces the time attorneys spend reviewing hours of footage, documents, and transcripts, allowing them to focus on case strategy and trial preparation.

Automated Translation Services

Instantly translate evidence in multiple languages, eliminating the delays and costs associated with manual transcription and interpretation. Attorneys can now review non-English content with ease, ensuring no critical information is overlooked in multilingual cases.

Cell Phone Extraction Viewer

A seamless tool for reviewing data extracted from mobile devices, including text messages, call logs, and app data. This feature presents information in an organized and intuitive manner, ensuring attorneys can quickly locate key evidence without sifting through raw data dumps.

Advanced Case Organization

A restructured case foldering interface that allows legal teams to categorize and organize evidence more efficiently.

Case Search 2.0

Enhanced search functionality provides a faster, more intelligent way to locate relevant case materials across vast repositories of digital evidence.

Axon remains dedicated to enhancing the legal process through technology, and Axon Justice Plus is our latest step in that journey. We look forward to supporting your mission with these innovations, helping you navigate the complexities of digital evidence with ease and confidence.

AXON JUSTICE PLUS FEATURE ADDITIONS

AXON BRIEF ONE

With video, audio, and documents making up a growing share of digital evidence, legal teams can be overwhelmed by the volume of materials they need to review. Manually analyzing hours of recordings or hundreds of documents can slow case preparation and increase the risk of overlooking key information.

Axon Brief One leverages AI-powered case summarization to help attorneys efficiently process large volumes of digital evidence, generating structured overviews that highlight the most critical case elements. Instead of sifting through raw files, legal teams receive a clear, AI-generated summary, enabling faster evidence review, decision-making, and trial preparation.

- ▶ **CASE SUMMARIZATION** – Automatically extracts key details from digital evidence, making it easier to identify what data needs attention.
- ▶ **KEY MOMENT IDENTIFICATION** – Flags important video or audio segments, allowing users to quickly locate crucial case details.
- ▶ **TIMELINE ORGANIZATION** – Automatically structures case materials into an accessible format, improving case analysis and preparation.

AUTOMATIC EVIDENCE TRANSLATION

As legal cases increasingly involve multilingual evidence, language barriers can delay case progress, complicate discovery, and increase reliance on costly external translation services. Reviewing foreign-language interviews, transcripts, and documents manually requires additional resources.

Axon Justice AI provides real-time, automated translation, enabling legal teams to efficiently review and share multilingual evidence without the need for third-party translators or time-consuming manual transcription. By converting foreign-language evidence into searchable, English-translated transcripts, attorneys can quickly analyze key details, cross-reference materials, and ensure comprehensive case preparation.

- ▶ **MULTI-LANGUAGE SUPPORT:** Translates AI-generated transcripts into 57+ languages (with more being added regularly).
- ▶ **REAL-TIME TRANSLATIONS:** Provides instant, accurate translations of digital evidence, minimizing delays.
- ▶ **AI-DRIVEN ACCURACY:** Maintains the integrity and context of original transcripts for precise communication.
- ▶ **FASTER CASE PREPARATION:** Speeds up the process of preparing cases by eliminating the need for manual translations, saving time and resources.

- ▶ **COST-EFFICIENCY:** Reduces reliance on expensive translation services, lowering overall case management costs.

CELL PHONE EXTRACTION INTEGRATION (COMING SOON)

Mobile forensic evidence, particularly Cellebrite/Magnet extractions, often come in complex formats that require specialized software for review. Axon Justice simplifies this by enabling agencies to manage UFDR files directly within their case workflow right in Axon Justice.

- ▶ **SEAMLESS CELLEBRITE FILE UPLOAD** – Extraction files can be uploaded directly into Axon Justice through Upload XT or transferred through Axon Partner Share from the forensics teams, helping agencies manage mobile forensic evidence more effectively.
- ▶ **INTEGRATED READER** – Investigators and attorneys can review mobile device data within Axon Justice, eliminating the need for additional software.
- ▶ Seamless integration available from Cellebrite Pathfinder to Axon Justice for users who are using the Pathfinder application.
- ▶ **AI-POWERED REVIEW TOOLS** – Transcription, search, BriefOne and filtering tools help identify relevant messages, call logs, and multimedia files.
- ▶ **CROSS-TEAM COLLABORATION** – Mobile evidence can be shared between law enforcement, prosecutors, and defense attorneys, helping to support legal discovery and review.

By integrating this functionality into Axon Justice, agencies can manage mobile forensic evidence within a structured digital case workflow.

ADVANCED CASE ORGANIZATION

Legal professionals across the U.S. have consistently expressed the need for a more structured, Windows-style foldering system for managing digital evidence within Axon Justice. While our current system utilizes a tagging and categorization approach, we recognize that many legal teams are accustomed to working with traditional hierarchical folder structures when organizing case materials.

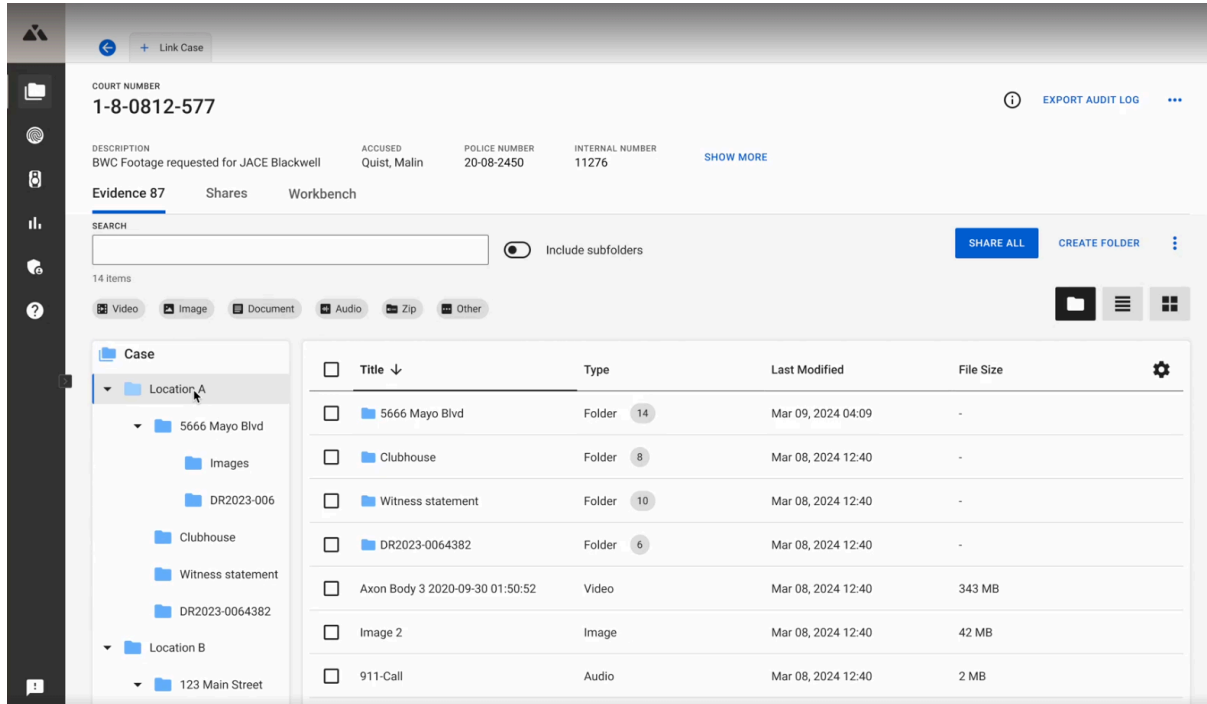

To address this feedback, we have developed a new enhanced foldering tool, designed to provide a more intuitive and efficient way to manage evidence. This enhancement will allow prosecutors, defense attorneys, and legal staff to organize files in a way that mirrors their existing workflows, making it easier to locate, review, and present case materials.

- ▶ **Familiarity & Ease of Use** - Legal teams can organize digital evidence using a folder-based approach similar to Windows Explorer, reducing the learning curve and improving adoption rates.
- ▶ **Improved Case Organization** - Attorneys can create, name, and arrange folders in a way that aligns with their specific case structures, streamlining case management.
- ▶ **Faster Evidence Retrieval** - A more structured foldering system means less time spent searching for critical files, allowing legal professionals to focus on case strategy rather than document management.

- ▶ **Seamless Transition & Integration** - This enhancement integrates seamlessly with existing Axon Justice features, ensuring that both tagging and structured foldering options remain available to accommodate different user preferences.
- ▶ **Scalability for Large Cases** - High-profile and complex cases often involve thousands of digital files. The enhanced foldering system will significantly improve document handling, making it easier to manage extensive evidence collections.

New Case Organization interface:

ADVANCED CASE SEARCH

Managing criminal cases for Prosecutors or Defense Attorneys often involves reviewing thousands of pages of PDFs, extensive audio and video recordings, and vast amounts of case-related data. Traditionally, locating specific details within this massive volume of digital evidence has been a time-consuming and labor-intensive process. Prosecutors, investigators, and defense attorneys are often forced to conduct multiple searches across different platforms, manually sift through documents, and rely on limited keyword indexing—slowing down investigations and case preparation.

To address these challenges, Axon Justice is introducing a powerful new search capability that extends beyond the existing in-case search functionality. This advanced search engine enables legal professionals to:

- ▶ **Search Within PDFs** - Many critical case documents—including police reports, forensic analysis, and legal filings—are stored as rich-text PDFs. Our enhanced search feature will index and extract text from these documents, allowing attorneys to quickly pinpoint specific phrases, names, or case details.

- ▶ **Search Transcripts from Video & Audio Files** - Reviewing recorded interviews, interrogations, body-worn camera footage, and wiretap recordings is often a slow and resource-intensive task. With our automated transcription technology, attorneys can now search within text-based transcripts of these recordings, making it easier to locate key statements, admissions, or inconsistencies in witness accounts.
- ▶ **Universal Case-Wide Search** - Instead of manually searching through separate files, media, and case documents, users can conduct a single, consolidated search across all case materials. This includes searching through emails, case notes, call logs, and evidence descriptions—ensuring no critical detail is missed.

3RD PARTY SOFTWARE INTEGRATIONS AVAILABLE

CASE MANAGEMENT SYSTEM (CMS) INTEGRATION

Legal professionals rely on CMS to track case progress, manage filings, and organize case-related records. By integrating digital evidence directly into CMS platforms, Axon Justice ensures that all case-related materials are securely tracked and linked, reducing the risk of misplaced evidence and maintaining an auditable chain of custody. Every interaction with evidence is automatically recorded, helping legal teams comply with disclosure rules, public records laws, and judicial transparency requirements.

- ▶ **SINGLE-PLATFORM ACCESS** – The goal of this integration is to bring files from both systems into one place without replicating the data, which would be costly for agencies. With the Axon Justice API's, data can be stored in Axon Justice while being linked into CMS for viewing.
- ▶ **AUTOMATED CASE LINKING** – Evidence uploaded to Axon Justice is associated with the correct case, keeping files categorized and easy to locate.
- ▶ **AUDIT TRAILS AND COMPLIANCE** – Every evidence interaction is documented in an audit log, helping legal teams track chain-of-custody activity and maintain case organization.

By connecting case records with digital evidence, Axon Justice helps legal teams streamline case management and improve collaboration across departments.

COURT TRIAL PRESENTATION SOFTWARE INTEGRATION

Presenting digital evidence in court is a key component of legal proceedings, and manual processes for preparing exhibits can increase workload and delay trials. Axon Justice integrates with third-party trial presentation software, allowing legal teams to prepare and present case materials more efficiently.

- ▶ **DIRECT EVIDENCE EXPORT** – Case files and digital evidence can be transferred to courtroom presentation systems without manual downloads or file conversions.
- ▶ **FORMAT STANDARDIZATION** – Helps legal teams prepare court-ready materials, reducing the risk of formatting issues or missing files.

- ▶ **WORKFLOW EFFICIENCY** – Attorneys can review and structure evidence before presentation, helping to build a clear, organized case narrative.

This integration helps simplify courtroom preparation, allowing legal teams to focus on case strategy rather than file logistics. If your team or your courts are using specific software to present in court through, Axon can likely integrate with those systems to provide an easier method of data transfer between your office and the courts.

JAIL CALL MANAGEMENT SYSTEM INTEGRATION

Jail call recordings often contain critical case information but reviewing them manually is time-intensive and inefficient. By integrating jail call management systems, Axon Justice allows legal teams to instantly transcribe and analyze conversations, ensuring that key statements and patterns are quickly identified for use in case strategy and discovery.

- ▶ **AUTOMATED CALL IMPORTS** – Recordings from correctional facilities are transferred directly into Axon Justice, reducing reliance on manual downloads.
- ▶ **AI-POWERED TRANSCRIPTION AND TRANSLATION** – Call transcripts are automatically generated, helping legal teams search, review, and analyze conversations.
- ▶ **CROSS-CALL SEARCH** – Investigators can search across multiple transcripts to identify relevant statements or patterns.
- ▶ **SECURE EVIDENCE SHARING** – Recordings can be shared between prosecutors, defense attorneys, and other legal teams, helping to support case preparation and discovery.
- ▶ **REDUCED COSTS FOR TRANSCRIPTION SERVICES** – By automating transcription and translation, agencies can reduce reliance on external transcription services, helping to save time and resources.

This integration helps legal teams review and manage jail call evidence within a structured system, reducing reliance on manual processing. If your office is exploring this option please let me know.

AXON JUSTICE HARDWARE ADD-ONS

Axon Justice is more than a digital evidence management system—it serves as the central hub for agencies using Axon’s comprehensive suite of hardware devices, creating a fully integrated evidence ecosystem. By seamlessly connecting evidence collection, storage, and case management, agencies reduce dependency on external submissions, improve chain-of-custody integrity, and accelerate case preparation.

AXON BODY-WORN CAMERAS

A body-worn camera system is a wearable recording device that captures high-quality video and audio, allowing investigators to document interviews, witness statements, and other case-related interactions in real time. Unlike standalone recording devices, Axon body-worn cameras can automatically upload footage to Axon Justice. Many Prosecution or Defense investigators across the US are using Axon Body worn Camera’s for video collection.

AXON INTERVIEW ROOM SYSTEMS

An interview room system is a fixed recording setup specifically designed for legal and investigative settings. These systems capture high-quality video and audio recordings of interviews, witness statements, and interrogations while ensuring secure storage, structured access, and easy retrieval for case preparation.

Axon Interview is a comprehensive, purpose-built interview room solution that provides:

- ▶ **HIGH-QUALITY RECORDING** – Captures clear, courtroom-ready video and audio evidence.
- ▶ **MULTI-CAMERA VIEWS** – Supports covert, dome, and PTZ cameras for different room setups.
- ▶ **AUTOMATED RECORDING CONTROLS** – Includes motion-based triggers and touch-panel controls to start and manage recordings easily.
- ▶ **CONTINUOUS REDUNDANCY** – Uses dual-server storage to help maintain secure and accessible recordings.

INTEGRATION WITH AXON JUSTICE

Once an interview is recorded, Axon Interview automatically uploads the file to Axon Justice, helping agencies eliminate manual file transfers and reduce administrative workload. From within Axon Justice, legal teams can:

- ▶ Auto-transcribe recordings into searchable, time-synced transcripts.
- ▶ Review and annotate interviews directly within the case file.
- ▶ Apply redactions to protect sensitive information before discovery or trial.
- ▶ Securely store, access, and share recordings with relevant stakeholders.
