Proposal for Materials Testing & Special Inspections
Oklahoma County Justice Center Phase I

March 18, 2026

Regarding: Proposal for Materials Testing and Special Inspections

Oklahoma County Justice Center Phase I
Oklahoma City, Oklahoma
2602-0207

In response to your request for a proposal for materials testing services for the Oklahoma County Justice Center Phase I, located in Oklahoma City, Oklahoma, we are pleased to provide our estimated budget for your consideration. Testing requirements were obtained from the specifications and plans and/or information you provided.

Qualifications

Standard was founded in 1951 as Standard Testing and Engineering Company, a professional engineering firm specializing in geotechnical and materials testing and engineering services for the construction and manufacturing industries. Today, Standard Engineering & Field Services has evolved to become a leader in not only geotechnical and materials testing, but also construction management and building code and envelope inspections to serve our clients effectively where they need us. Standard employs highly trained and experienced engineers, inspectors, and professionals at our facilities in [Oklahoma City](#), [Spencer](#), [Tulsa](#), [Lawton](#), [Enid](#), and [Guymon](#).

Overall qualifications and specific competence in performing tests and inspections are most reliably demonstrated by (1) professional licensure and (2) accreditation by a recognized accreditation authority. Standard Engineering & Field Services holds a certificate of authorization (CA #7933) from the Oklahoma State Board of Registration for Professional Engineers and Land Surveyors and employs over [140 experienced engineers, certified testing technicians, and licensed inspectors](#).

Standard's laboratories hold accreditation and/or validation by the AASHTO (American Association of State Highway and Transportation Officials) Accreditation Program (AAP) and the U.S. Army Corps of Engineers' validation program with accreditation in asphalt mixture, soils, aggregate, sprayed fire-resistive material, and concrete testing. Additionally Standard holds accreditation for C1077 (Aggregate), D3666 (Concrete), D3666 (Aggregate), D3666 (Asphalt Mixture), D3740 (Soils), and [AASHTO E329 for Aggregate, Asphalt Mixture, Concrete, Sprayed Fire-Resistive Material, and Soil](#), "Specifications for Agencies Engaged in the Testing and/or Inspection of Materials Used in Construction."

Standard Engineering & Field Services is currently accredited by AAP for over 140 different ASTM testing standards.

The Importance of Hiring an ASTM E329 Qualified Testing Laboratory

1. Participation in inter-laboratory comparisons and proficiency testing programs.
2. Trained and certified staff.
3. Equipment calibration at required intervals.
4. Maintains a Quality System appropriate to the type, range and volume of inspection and testing activities undertaken.
5. Inspected and accredited - by recognized accreditation authority at least every three years.

Our ASTM E329 accreditation means that we will provide the assurance that our testing laboratory is qualified to do the work right. Many federal, state, local and private contracts specify that testing services be performed by an ASTM E329 accredited laboratory. Risk and liability for the owner, contractor, and supplier are reduced through use of an ASTM E329 accredited laboratory because results are recognized by the courts and are readily accepted by knowledgeable construction professionals.

Special Inspections

If Special Inspections under the IBC Section 1704, are required, we must have a copy of the project plans and specifications for reference. All special Inspection Reports are reviewed and signed by a registered professional engineer or certified inspector.

Scope of Work / Pricing

Below is the estimated budget for each scope of work based on the plans and specifications provided. This proposal does not represent a lump sum price, it is our estimated budget for this scope of work. Should the scope of work change we will be happy to discuss amendments to scope and pricing. Additional tests and inspections, not identified at this time, if required and/or requested, will be performed at our standard unit rates. Prices are subject to change based on overtime, holidays, and the sequence of construction activities dictated by the prime contractor and various trade subcontractors. An administrative charge of 2.5% of the invoice amount will be added to all invoices. A report preparation, review, and distribution charge associated with each report will be billed in accordance with the below rate schedule. Hourly rate related to all field activities will be billed portal-to-portal at a 4-hour minimum.

Authorization

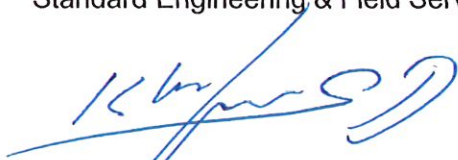

Please complete and return an executed copy of the Project Data Sheet - Agreement for Services as soon as possible. If you have any proposed revisions or other authorization forms, please forward these for our review. The Project Data Sheet – Agreement for Services form provides further detail on report distribution, invoicing instructions, and allows us to gather necessary information which is critical so that we can set up your project in our reporting system.

I can also be reached at the same number if you need any additional assistance. All work must be scheduled at least 24 hours in advance to ensure our staff is available to meet your needs.
