ATTACHMENT A: RISK-BASED SUBRECIPIENT MONITORING

This recipient is **Low RISK**

- i. All standard processes, as outlined in the Final Rule, are permitted.
- ii. Random sampling of expenditures for supporting documentation/detail should be conducted at least once per year.
- iii. County must send reminders to the entity of federal single audit requirements.
 - 1. If the County subaward to the entity is \$750,000 or more, subrecipient must complete a federal single audit and County is responsible for confirming the entity completes a federal single audit. If the entity does not complete the federal single audit, they are in violation of federal compliance requirements and corrective action must be taken.
 - 2. If County subaward to the entity is less than \$750,000, County should still notify the entity of the requirement as the \$750,000 threshold is a cumulative of all federal funds an entity receives during the entity's fiscal year. County must verify if an entity is required to perform a federal single audit by checking the total of federal awards made to an entity through www.usaspending.gov. Corrective action is needed if the federal single audit threshold is met but the entity has not completed a federal single audit.

ATTACHMENT B1: 20005 PROJECT DETAILS

Project: Griffin Memorial Hospital

Description:

According to the American Psychiatric Association, ongoing stress and uncertainty from Covid-19 have increased demand for mental health services. Currently, there are not enough psychiatric hospital beds to address the need - this will become a more significant limitation as we experience the pandemic's aftereffects. Addressing barriers like timely access to higher levels of care for both mental health and addiction services will ensure that negative behavioral health effects of Covid-19 are negated. ODMHSAS proposes to build a replacement facility for Griffin Memorial Hospital and add an additional 100 beds to this new build. Oklahoma desperately needs to replace its 100-year-old state psychiatric hospital. The cost proposed is net after sales of the Norman land where the current hospital resides. This new facility would be state of the art, developing the behavioral health workforce and investing in Oklahoma-grown expertise in psychiatry through enhanced residency programming.

Expense Type: Capital expenditure for planned infrastructure project

Amount: \$1,500,000

ATTACHMENT B2: USE OF EVIDENCE REPORTING

As part of reporting, recipients should describe whether and how evidence-based interventions and/or program evaluation are incorporated into their SLFRF program. Recipients may include links to evidence standards, evidence dashboards, evaluation policies, and other public facing tools that are used to track and communicate the use of evidence and evaluation for Fiscal Recovery Funds.

When reporting, recipients must also specifically identify the dollar amount of the total project spending that is allocated towards evidence-based interventions for each project.

Amount Spent: \$1,500,000

Evidence-based interventions in a psychiatric hospital refer to treatment approaches and strategies that are grounded in empirical evidence and have been shown to improve patient outcomes and well-being. Griffin employs a multidisciplinary approach, utilizing a combination of evidence-based interventions tailored to each patient's unique circumstances to provide comprehensive and effective care. Here are some examples of evidence-based interventions:

- Cognitive Behavioral Therapy (CBT): CBT is a widely recognized and extensively studied form of psychotherapy; Medication Management: prescribing and monitoring psychotropic medications based on established guidelines and research;
- Dialectical Behavior Therapy (DBT): combines elements of cognitive-behavioral techniques with mindfulness practices. DBT helps individuals regulate emotions, develop healthy coping mechanisms, and build interpersonal skills;
- Group Therapy: Various evidence-based group therapies, such as psychoeducational groups, support groups, and skills training groups, provide opportunities for individuals to share experiences, learn from others, and develop a sense of belonging;
- Psychosocial Rehabilitation: These evidence-based approaches may include supported employment, social skills training, and community integration programs. The goal is to help individuals develop practical skills, enhance social connections, and regain independence;
- Family Therapy: It is particularly effective in treating conditions that impact the family system, such as eating disorders or substance use disorders;
- Trauma-Focused Interventions: evidence-based trauma-focused interventions, such as Eye Movement Desensitization and Reprocessing (EMDR) or Prolonged Exposure Therapy (PE), can be effective in addressing trauma-related symptoms.
- Medication management: It is an essential component of psychiatric care and is considered an evidence-based practice because it has been shown to be effective in treating a variety of psychiatric disorders, including depression, anxiety, bipolar disorder, and schizophrenia. Research has demonstrated that medication management can significantly reduce symptoms, improve quality of life, and prevent relapse.

ATTACHMENT B3: REQUIRED PERFORMANCE METRICS

As part of reporting, recipients should describe how performance management is incorporated into their SLFRF program, including how they are tracking their overarching jurisdictional goals for these funds as well as measuring results for individual projects.

Performance indicators should include both output and outcome measures. Output measures provide valuable information about the early implementation stages of a project. Outcome measures provide information about whether a project is achieving its overall goals.

B3.1: MANDATORY PERFORMANCE REPORTING

Below is a list of required data for Project 20005 Griffin Memorial Hospital:

- Brief description of structure and objectives of assistance program(s), including public health or negative economic impact experienced: *There has been a higher prevalence of anxiety, depression, and substance use among Oklahomans during the pandemic. Along with increasing rates of depression and anxiety, there has been an increase in Oklahomans who have died by suicide. Fear of COVID-19 infection contributed to an increase in the prevalence of mental health conditions, especially those related to anxiety and depression. Public health pandemic response measures, such as social distancing requirements and business closures, further increased stress and risk factors for mental health conditions because of economic uncertainty and increased social isolation. Oklahoma has also seen an uptick in pandemic-related overdose deaths, primarily caused by fentanyl and analogous substances. Building a new and expanded psychiatric hospital will add much needed capacity to address current limitations of more intensive levels of care in Oklahoma and the impact the pandemic will continue to have on Oklahomans.*
- Brief description of how a recipient's response is related and reasonably proportional to a public health or negative economic impact of COVID-19: *According to the American Psychiatric Association, ongoing stress and uncertainty from Covid-19 have increased demand for mental health services. Currently, there are not enough psychiatric hospital beds to address the need - this will become a more significant limitation as we experience the pandemic's aftereffects. Addressing barriers like timely access to higher levels of care for both mental health and addiction services will ensure that negative behavioral health effects of Covid-19 are negated. This new facility would be state of the art, developing the behavioral health workforce and investing in Oklahoma-grown expertise in psychiatry through enhanced residency programming.*
- Does this project include a capital expenditure?: *Yes*
- Total expected capital expenditure, including pre-development costs, if applicable: *146M*
- Type of capital expenditure, based on the following enumerated uses (Collection began in July 2022):

- COVID-19 testing sites and laboratories, and acquisition of related equipment
- COVID-19 vaccination sites

- Technology infrastructure to adapt government operations to the pandemic (e.g.,

video-conferencing software, improvements to case management systems or data sharing resources), reduce government backlogs, or meet increased maintenance needs

▪ Other (please specify): *Behavioral health facilities and equipment (e.g., inpatient or outpatient mental health)*

B3.2: OUTCOME AND OUTPUT MEASURES

KPIs provided by the subrecipient that are required to be tracked are as follows:

- Total construction budget variance (+/- %): *Project is still in development stage and total project budget is still being developed.*
- Project on time variance (Construction days +/-): *Project is still in development stage and construction timeline is still being developed.*

B3.3: COMPLIANCE WITH TITLE VI

HHS guidance requires recipients of federal funding to take reasonable steps to ensure Limited English Proficiency (LEP) and/or non-English speaking individuals have meaningful access to programs and services. This standard is designed to be a flexible and fact dependent. As such, individuals needing behavioral health inpatient services are offered at least one of the following methods of communication to benefit from this level of care, including access to bilingual staff, staff or contract interpreters, or interpreter lines.
